PROFESSIONAL SUMMARY

Results-driven Software Developer with 3+ years of experience in the banking and fintech domain, specializing in Oracle PL/SQL, Java, and Spring Boot. Demonstrated expertise in architecting scalable prepaid card platforms, multi-currency forex systems, and high-volume financial transaction engines for leading Indian banks including RBL, Axis, and Canara Bank. Proven track record in delivering end-to-end solutions from requirement analysis to production deployment, with strong focus on PCI-DSS compliance, API security, and performance optimization. Adept at leading cross-functional delivery teams and directly coordinating with enterprise clients.

TECHNICAL SKILLS

Database: Oracle SQL & PL/SQL, Stored Procedures, Functions, Triggers, Query Optimization

Languages: Java, JavaScript, HTML, CSS

Frameworks: Spring Boot, Spring MVC

API & Integration: REST APIs, SOAP APIs, Secure API Integration, Webhook Handling

Security & Compliance: PCI-DSS (PA-DSS / PCIS3), Secure Coding, Data Encryption

Tools & IDEs: IntelliJ IDEA, Eclipse, VS Code, Postman, SonarQube, Jasper Reports

DevOps & Version Control: Git, Linux/Ubuntu, UAT-to-Production Deployment Pipelines

WORK EXPERIENCE

Software Developer (Team Lead – Recent Projects) | Yalamanchili Payment & Cards Sep 2022 – Present

- Designed and maintained Oracle PL/SQL-driven banking backends processing high-volume financial transactions across prepaid card, multi-currency forex, and gift card platforms, supporting 3+ major bank clients simultaneously.
- Led end-to-end delivery of 2 flagship projects (Canara Bank Prepaid Cards & RBL Forex Cards) as Team Lead, coordinating client requirements, API integrations, and production deployments — reducing delivery cycle time by ~20%.
- Engineered 30+ complex stored procedures and functions to implement core business logic for transaction processing, PIN management, card controls, and reconciliation workflows.
- Integrated and maintained REST & SOAP APIs for real-time multi-currency transaction processing and event-driven SMS/email notifications, improving system responsiveness and reducing manual interventions.
- Optimized critical SQL queries and PL/SQL procedures, achieving measurable reduction in processing times for high-load transaction batches and improving overall system throughput.
- Automated financial reconciliation and audit reporting using Oracle SQL and Jasper Reports, eliminating manual effort and improving reporting accuracy for TTUM generation at Canara Bank.
- Enforced code quality and security compliance via SonarQube reviews; ensured all solutions adhered to PCI-DSS (PA-DSS/PCIS3) standards for secure card data handling.
- Handled complete deployment lifecycle (UAT to Production) for mission-critical banking systems, ensuring zero-downtime rollouts and rapid incident resolution during production support.

KEY PROJECTS

RBL Bank – Multi-Currency Forex Cards (Team Lead)

- Acting Delivery Lead for multi-currency forex card solution; managed end-to-end project lifecycle, client coordination, and Oracle PL/SQL-based transaction workflows integrated with Yalamanchili's core platform.
- Integrated real-time REST & SOAP APIs for cross-currency settlement, ensuring PCI-DSS-compliant secure processing across international card transactions.

Canara Bank – Prepaid Gift, Classic & Plus Cards (Team Lead)

- Led full-cycle product delivery for prepaid card suite including Customer Onboarding, Gift Cards, and Classic/Plus Cards; designed Oracle-based backend business logic with secure Yalamanchili platform integration.
- Managed API integrations and client delivery coordination; ensured PA-DSS/PCIS3 compliance for secure cardholder data processing.

RBL Bank – Forex Travel Cards

- Developed branch and customer portals using Java and Spring Boot; implemented Oracle PL/SQL backend for business logic and transaction processing supporting multi-currency operations.
- Integrated external APIs for real-time forex transactions; contributed to PCI-DSS compliance and system integration delivery.

Axis Bank – PAN Aadhaar Linkage

- Implemented a secure PAN-Aadhaar linkage system with encryption and Oracle PL/SQL-based validation logic, ensuring data integrity and compliance with banking regulatory standards.

Axis Bank & Canara Bank – Notification System

- Developed real-time SMS and email notification services using API integrations; leveraged Oracle database triggers and procedures to enable event-driven alerts for card and account activities.

TTUM Generation – Canara Bank

- Automated the Transaction Turnover Upload Mechanism using Oracle SQL/PL/SQL and Jasper Reports, reducing manual reconciliation effort and improving audit-readiness for financial operations.

EDUCATION

Master of Computer Applications (MCA)

Andhra University

2024 – 2026

Bachelor of Science – Chemistry

Graduated with 86%

2018 – 2021

ADDITIONAL INFORMATION

Languages: English, Telugu, Hindi | **Core Strengths:** Oracle PL/SQL, Business Logic Design, API Integration, Banking Domain, Client Delivery, Secure Coding
